Only railroads reporting EOD hours in 2020 used for report. Train accidents reported on form 54 represent involvement. The Group Frequency Rate is calculated from data reported to FRA all railroads excepting Cass Is, Amtrak, commuter railroads and transit agencies. Key: PMYSMI = per million yard switching train miles, Abs = Absent, Chg = Change, % Yard Switch = percent of total train miles that took place in yards. EOD = employee on duty (Type A), PMTM = per million train miles (a train mile is the movement of a train for a distance of one mile). Pass? = Transports Passengers

Only railroads reporting EOD hours in 2020 used for report. Train accidents reported on form 54 represent involvement. The Group Frequency Rate is calculated from data reported to FRA all railroads excepting Cass Is, Amtrak, commuter railroads and transit agencies. Key: PMYSMI = per million yard switching train miles, Abs = Absent, Chg = Change, % Yard Switch = percent of total train miles that took place in yards. EOD = employee on duty (Type A), PMTM = per million train miles (a train mile is the movement of a train for a distance of one mile). Pass? = Transports Passengers

Only railroads reporting EOD hours in 2020 used for report. Train accidents reported on form 54 represent involvement. The Group Frequency Rate is calculated from data reported to FRA all railroads excepting Cass Is, Amtrak, commuter railroads and transit agencies. Key: PMYSMI = per million yard switching train miles, Abs = Absent, Chg = Change, % Yard Switch = percent of total train miles that took place in yards. EOD = employee on duty (Type A), PMTMM = per million train miles (a train mile is the movement of a train for a distance of one mile). Pass? = Transports Passengers
